Data Pipeline
Native ECharts Data (Seed Collection)
GPT-4o
LLM-driven Synthesis
Code Perturbation
Non-default, Redundant Code Configs
Interaction Constraints
Interaction Trigger Conditions
Real-World Editable
Editable Instruction & Ground Truth
The ChartInt Tasks
Static Reconstruction
1、Native Reconstruction
2、Style-Perturbed
Synthetically Perturbed Stress Test Input
Executable Code
Real-World Editable
4、Soft-coded Data Update
New CSV File
Update Data Only
Chart with new data but same style
5、Visual Style Adjustment
Instruction: "Change Title Color to Red"
Edit
Red title
Chart with red title
6、Cross-Chart Style Transfer
Chart A (Data)
Chart B (Style)
Cross-Chart Transfer
Chart C (Data of A + Style of B)
Interaction
3、Interaction Task
Action
dispatchAction
Set State (S)
